

Residential CON29DW Drainage and Water

The CON29DW drainage and water enquiry is recommended by The Law Society for every property transaction. It is completed by the water companies of England and Wales.

In 2002, The Law Society launched the CON29DW with the aim of providing a standard form of drainage enquiry for use in property conveyancing. The search was designed to highlight potential issues with the public sewer and water network that serve the property which could lead to maintenance costs or may have an impact upon property value.

The CON29DW produced by SafeMove is compiled from Yorkshire Water's asset and billing information
